EDUCATION

Candidate for Bachelor of Computer Science Honours

University of Waterloo

Sep. 2023 – Expected Apr. 2028

- cGPA: 94.18% (3.97/4.00), Awards: René Descartes National Scholarship, President's Scholarship of Distinction

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, HTML/CSS, C/C++, Java, SQL

Frameworks/Libraries: React.js, Django, Node.js, Pandas, Pytest, Express.js, React-Query, Tailwind, Playwright

Technologies: REST, GraphQL, Postgres, MongoDB, Snowflake, Elasticsearch, Docker, BASH

Developer Tools: Git, Visual Studio Code, Jupyter Notebook, DataGrip, PyCharm, Jira, Linear

Certifications: AWS Certified Cloud Practitioner

EXPERIENCES

Software Engineering Intern

Secoda Inc.

May 2024 – Aug. 2024

- Created a failure detection dashboard for data integrations, reducing incident response time by **70%**
- Decreased integration query speeds by **47%** through optimization of **Django ORM** database queries
- Engineered a sorting algorithm using dynamic weights with **Elasticsearch** to personalize user search results, built behind a search testing framework that is currently being shadow deployed
- Created analytics widgets for users to visualize their data trends and optimized metric update times by **32%**
- Developed a **Coalesce** integration to import jobs and tests built on **Snowflake** as well as data lineage

Programmer

Dupak Inc.

Jul. 2023 – Aug. 2023

- Reduced annual audit preparation time by **80%** by developing a label-based organization method and implementing **Google API** plugins to automate metadata updates
- Continually updated and collaborated with management during development to ensure requirements were met

Web Developer

AWA DK Canada Inc.

Sep. 2021 – Apr. 2024

- Designed and created a website using **Wordpress** as the company's primary media platform
- Developed a multilingual setting and customized product pages using **HTML+CSS** detailing all specifications

PROJECTS

Chameleon | *Typescript, React.js, Tailwind, FastAPI, Axios, GPT API, shadcn*

Sep. 2024

- Made a website that lets users input design files/images to produce customized frontend pages
- Developed structured JSONs from design files with **GPT API**, and parsed them into component trees

Memory Melody | *JavaScript, React.js, Node.js, Express.js, Axios, GPT API, Cheerio*

Jan. 2024

- Created a website that lets users input keywords to display nostalgic events while listening to music
- Fetched related images by using **Cheerio** and **GPT API**, and built communication with **Axios**

Harmony Haven | *JavaScript, React.js, Node.js, Express.js, MongoDB, Chart.js*

Aug. 2023

- Developed a game-like web application to improve users' singing using real-time pitch comparisons
- Dynamically sourced songs and lyrics from **YouTube** and **Spotify API** to display to the user
- Analyzed pitch with the **Web Audio API**, visualized data with **Chart.js**, and stored information in **MongoDB**

Optimal Shopper | *JavaScript, React.js, Node.js, Express.js, puppeteer*

Jul. 2023

- Built a website that displays and compares products from nearby grocery stores
- Allowed users to sort results by distance, price, and store, and add products to a shopping list
- Scraped data with **puppeteer** in real-time, and communicated between front-end and backend with **Express.js**

Spectra | *Python, Raspberry Pi, OpenCV, Tensorflow*

Jul. 2022

- Created an over-the-shoulder bag with a camera that provides audio feedback to assist visually impaired people
- Integrated text recognition and emotion detection features using **OpenCV** and **Tensorflow** into a **Raspberry Pi**
- Demonstrated the product to Ontario Tech University and was recognized for incubation
